Application for Private No Wake Buoy Placement

FOR GRDA USE ONLY:		UTM Coordinate		Buoy and Light Payment Received: _____ App Fee Received: _____		
Reservoir	GRDA Map & Tract Number	x	y	Permit Number		

NAME: _____ EMAIL ADDRESS: _____

MAILING ADDRESS: _____ City _____ State _____ Zip _____

LAKE 911 ADDRESS: _____ City _____ State _____ Zip _____

Phone: Home _____ Work _____ Cell _____

LOCATION OF PROPERTY: Lake _____ Arm/Cove/Area _____

DRIVING DIRECTIONS BY LAND: _____

GATED COMMUNITY ACCESS CODE: _____ GRDA Dock Permit No: _____

NAME OF PERMITTED DOCK BUILDER INSTALLING BUOY: _____

APPLICATION IS MADE FOR THE FOLLOWING: NUMBER Of REQUESTED BUOYS: _____Describe placement and reason for the buoy (include a map, satellite image, or drawing of location of dock with proposed buoy placement):

TERMS AND CONDITIONS: In consideration of the Grand River Dam Authority granting a Buoy to the Applicant, Applicant hereby consents and agrees to the following:

Upon receipt of notification by GRDA, applicant agrees to promptly pay the application fee of \$500. Applicant must purchase buoy from GRDA and hire a qualified installation contractor permitted by GRDA to install the buoy. Applicant agrees to label buoy with GRDA issued permit stickers.

Buoy and installation is not covered by any warranty, express or implied and replacement of a damaged, lost or stolen buoy will require another application and fee.

Applicant agrees to abide by the Private Buoy Installation Specifications and Rules and Regulations Governing the Use of Shorelands and Waters of GRDA, which are incorporated and made a part of this agreement, and that a buoy placement issued upon this application may be revoked at any time by GRDA.

Any buoy not maintained in its proper location shall be subject to removal by GRDA, without applicants consent.

All buoys are primarily warning devices for the convenience of the public, and should not be relied upon solely as navigational aids. GRDA assumes no liability or responsibility for loss or damages to life or property arising out of the public's reliance upon said devices.

If request is denied, the applicant will receive a written notification and refunded cost of buoy. The application fee is non-refundable.

I agree to update GRDA with all address changes and acknowledge that GRDA will serve all notices and invoices related to the permit to the last address on file and/or the email address given above, if any. I acknowledge continuing maintenance and liability for the buoy are solely my responsibility and not GRDA's responsibility. I hereby certify that I have read the above and foregoing, together with the Regulations and Lake Rules mentioned therein, that I am familiar with the same and I hereby agree to be bound by the terms expressed above.

Date _____ Signature of Applicant _____

RECOMMENDATION OF APPROVAL BY GRDA

I hereby certify that I have inspected the above proposal and the premises involved, and that the same should be approved. Your request has been granted for the described buoy on the Waters and Shorelands of GRDA subject to the conditions contained in the application and the Rules and Regulations Governing the Use of Shorelands and Waters of GRDA. This buoy placement may be revoked at any time by GRDA if it is determined that lake conditions create an unsafe or unsuitable environment for placement of previously approved buoy.

FINAL INSPECTION BY GRDA

I hereby certify that I have inspected the installation of the approved buoy and the premises involved, and that the installation complies with the Private Buoy Installation Specifications and the Rules and Regulations Governing the Use of Shorelines and Waters of GRDA.

Date _____ GRDA Police _____

Date _____ GRDA Police _____

Private Buoy Installation Requirements

All buoys and navigation devices on GRDA lakes must be approved and permitted by GRDA Police. Any property owner that lives adjacent to GRDA waterways may submit an application to request the placement of a No Wake buoy for their property. The following protocol must be followed to complete the process for a private buoy installation:

- An "Application for Private No Wake Buoy Placement" can be obtained at www.grda.com (attached). The application must be completed in its entirety and signed for consideration.
- The application fee is \$500.00 and is required to pay costs associated with the pre and post installation inspections and permitting by officials of GRDA Police. The application fee is non-refundable.
- All buoys must be provided by GRDA for uniformity in navigation controls and to ensure the devices meet required specifications. Once the application for the private buoy is approved, applicant MUST purchase the buoy(s) and light(s) from GRDA. The cost for a No Wake buoy and LED light is based on current market pricing, but typically costs between \$600.00 to \$700.00 per buoy. Please contact permitting for current pricing.
- All private buoys must be installed by a GRDA permitted dock installer using the required specifications (attached) and hardware. The installer must provide all hardware for the installation of the buoy based on GRDA installation specifications.
- The applicant shall notify GRDA upon completion of the installation of the buoy(s) so that a post-installation inspection can be completed. Any navigation device that is found to not be in compliance with the installation specifications will be ordered removed by the installer from GRDA waters.
- All approved buoys must have a GRDA Private Buoy Permit decal affixed to the buoy.
- Applicant will be responsible for all maintenance of the private buoy, including the replacement and repair of the buoy, buoy light and installation.

All inquiries regarding private buoy requests should be made to:

lakepermits@grda.com

Grand River Dam Authority

Private Buoy Installation Specifications

All buoys and navigational devices on GRDA lakes and waters must meet the following GRDA specifications:

- Private buoys may only be installed upon issuance of a permit by GRDA. All permitted buoys will have a proper permit decal affixed to the buoy. Non-permitted buoys are subject to removal by GRDA at the cost of the installer.
- All buoys & lights installed on GRDA lakes and waters must be purchased from GRDA and must be installed by a GRDA permitted dock installer.
- Private buoys are subject to pre & post-installation inspection and approval.
- Any permit for a private buoy can be revoked or cancelled for just cause resulting in the removal of the installed buoy at the cost of the permit holder upon notification by GRDA.

All properly permitted buoys installed on GRDA lakes and waters must be installed using the following specifications for the installation of the devices:

1. All private buoys must be obtained from GRDA and must be a white can type buoy with reflective markings filled with urethane foam with float collar and ballast.
2. All buoys must have a clear flashing approved solar-powered LED lamp purchased from GRDA attached to the top of the buoy.
3. All chain, cable, wire rope, connectors and hardware used for the installation of the buoy must be made of galvanized or stainless steel.
4. Galvanized 5/8 inch wire rope, cable or 3/8 inch chain must be used to secure the buoy to the anchor.
5. All anchors must be made of square based concrete of at least 1,000 pound weight with a minimum of 1/2 inch round galvanized steel eye.
6. All buoys must be attached to the chain/cable with a 3/4 inch galvanized steel swivel and shackle to reduce wear and prevent chain ball-up or cable twist.
7. Cable thimbles must be used at the connection points on the buoy and the anchor to reduce wear on the installed cable.
8. A minimum of two (2) cable clamps must be used on each end of the cable attachment points and the cradle must be attached against the main cable.
9. All buoys must be installed at a distance no greater than 140 feet from the protected structure and must be placed 5' inside the applicant's property corners.
10. Cable/chain length should be 15 feet longer than the depth of the location of installation at normal height to account for the rise & fall of water levels.
